Have you ever seen a helicopter whirling in the sky? It can fly straight up and _______ and even hover (stay in one place in the air). Helicopters have many jobs. Some help people watch the _________ below, others take people sightseeing!

A _______ sits at the front and flies the helicopter.

A _______ lets the pilot talk to people on the ground.

A long tail with spinning blades at the end keeps the helicopter __________.

Flat _______ whirl around and lift the helicopter into the air.

The pilot moves a __________ to make the helicopter go up and down or stay still.

The helicopter _______ gently on its two strong skids.

__________ sit in the bubble-shaped cabin and look at the amazing view.
