

To help you complete this worksheet, use the *Inventions* book.

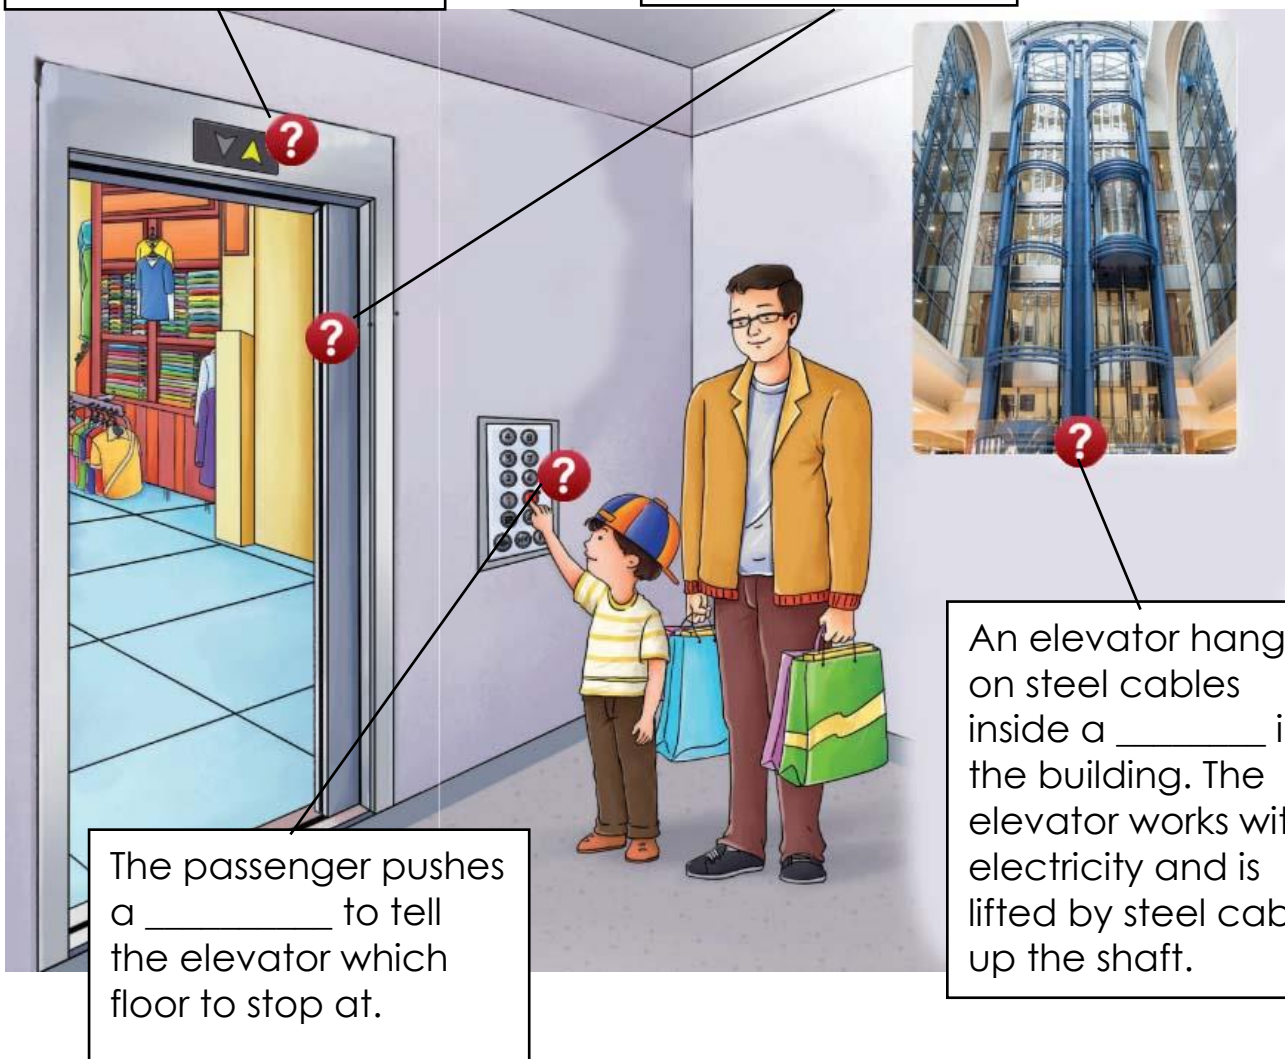

Elevator

Elevators really give us a _____! They carry _____ and objects from one _____ to another in a building. It would be tiring to climb all the _____ in a skyscraper without an elevator!

The _____ tells us if the elevator is moving up or down through the building.

The elevator _____ open after the car arrives at the floor.

The passenger pushes a _____ to tell the elevator which floor to stop at.

An elevator hangs on steel cables inside a _____ in the building. The elevator works with electricity and is lifted by steel cables up the shaft.
