

To help you complete this worksheet, use the *A Place in Space* book.

Jupiter is the \_\_\_\_\_ planet in the solar system. It is bigger than all the other \_\_\_\_\_ put together! Jupiter is not made of \_\_\_\_\_ like Earth is. Jupiter is made up of thick clouds of \_\_\_\_\_.

Jupiter is made up of thick red, brown, yellow and white \_\_\_\_\_ of \_\_\_\_\_.

U.S. scientists sent a spacecraft named \_\_\_\_\_ to study the planet Jupiter. It took Juno almost \_\_\_\_\_ years to travel from Earth to Jupiter!

Jupiter has thin \_\_\_\_\_ around its middle. The rings are made up of small pieces of dust.

The colour of the \_\_\_\_\_ \_\_\_\_\_ changes from dark-red to brownish.
