

To help you complete this worksheet, use the *A Place in Space* book.

Saturn is the second \_\_\_\_\_ planet in the solar system. Like Jupiter, Saturn is a huge spinning cloud of \_\_\_\_\_. It does not have any solid \_\_\_\_\_. Around Saturn are \_\_\_\_\_ flat rings made of little bits of shiny ice. Saturn's nickname is "the \_\_\_\_\_ of the solar system". Because of its beautiful rings.

Saturn looks like it is wrapped in \_\_\_\_\_ because it has clouds of different colours.

Scientists have found many \_\_\_\_\_ of different sizes travelling around Saturn.

\_\_\_\_\_ spin around the planet.

The Italian scientist \_\_\_\_\_ was the first person to see Saturn's rings. In 1610, he looked at Saturn through one of the first \_\_\_\_\_ made.
