## The ginkgo tree

The ginkgo tree has half-\_\_\_\_\_ leaves that look like small hand fans. Some people in the countries of China and \_\_\_\_\_ think of ginkoes as very special, or sacred, trees. They plant ginkoes in the gardens of their \_\_\_\_\_. Temples are places where people pray. Some ginkoes alive today may be more than \_\_\_\_\_ years old. There is only \_\_\_\_\_ species, or kind, of ginkgo in the world now.

Ginkgo leaves grow at the end of short \_\_\_\_\_.

**It's a fact!**  
A dinosaur is shown eating a green leaf. A red question mark is next to it.

The ginkgo tree is the last survivor of a group of trees that lived millions of years ago. Many \_\_\_\_\_ probably munched on the leaves of these trees for food.

The fan-shaped \_\_\_\_\_ grow in bunches.

The trunk is covered by brown \_\_\_\_\_.
