## Backhoe

A backhoe picks up dirt and digs big \_\_\_\_\_. It's like a giant bucket and shovel. It scoops up \_\_\_\_\_ and moves it from one place to another.

Metal \_\_\_\_\_, as sharp as knives, cut into the rocky ground.

A long metal \_\_\_\_\_ moves the bucket to where the driver wants to dig.

The driver pulls a \_\_\_\_\_ to lift the bucket.

A large heavy pile of soil and rocks can be \_\_\_\_\_ into the bucket.

A turntable lets the cab turn in a circle to pick up \_\_\_\_\_ in one place and then turn and \_\_\_\_\_ it in another.
