

To help you complete this worksheet, use the *Tough Trucks* book.

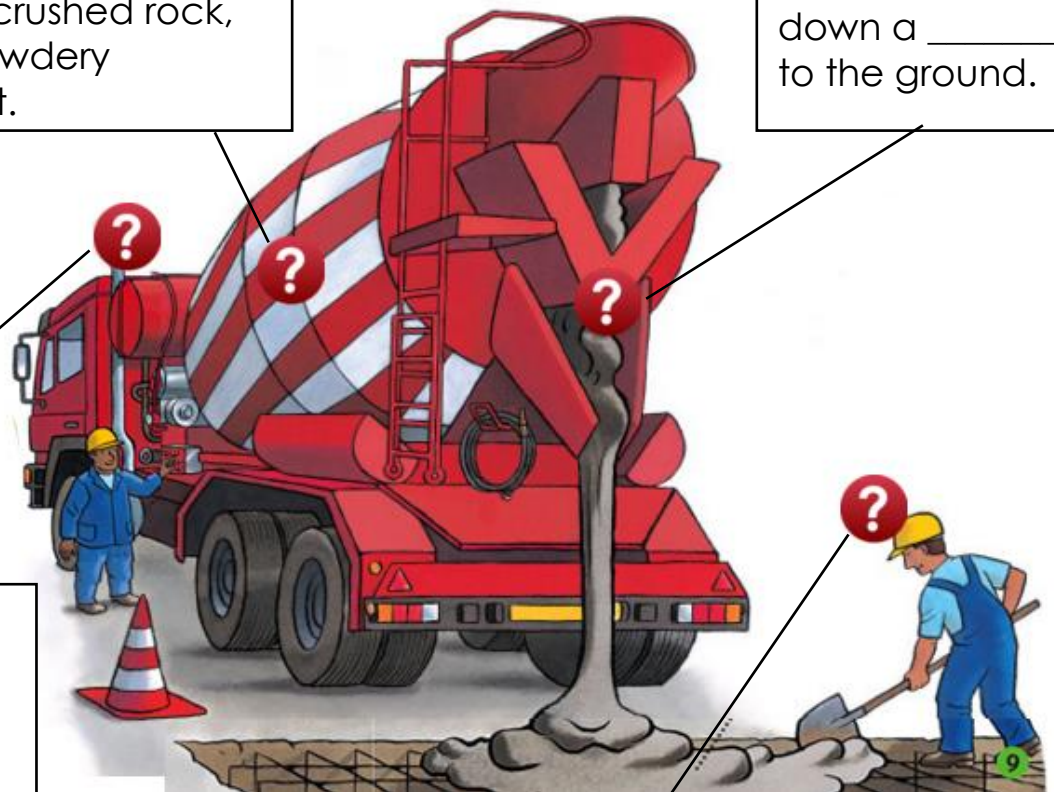

A cement mixer delivers thick, wet \_\_\_\_\_ to a construction site. The concrete is mixed and poured. After a while, it becomes \_\_\_\_\_ and strong. Concrete is used to make walls, \_\_\_\_\_, roofs, and even bridges and highways.

The drum turns slowly to mix the \_\_\_\_\_, water, crushed rock, and powdery cement.

The wet concrete slides down a \_\_\_\_\_ to the ground.

Water for making the concrete is stored in a small \_\_\_\_\_.

A construction worker \_\_\_\_\_ the concrete. Soon, it will dry as hard as a rock!
