## Hives and Insect Nests

A wasp nest is home to hundreds of striped wasps. Honey bees live together too, in homes called \_\_\_\_\_. Inside the hives, the bees make sweet \_\_\_\_\_ that is delicious to eat.

Wasp nests can hang down from the \_\_\_\_\_ of a tree.

Worker wasps chew \_\_\_\_\_ to make paper to build the nest.

The queen wasp lays tiny white \_\_\_\_\_.

Each egg has its own special room called a \_\_\_\_\_.

The eggs hatch into fat \_\_\_\_\_ that eat all day.
