

# Light Worksheet

Find under **Nature and Science**

1. True or False: In order to see you need light.
2. True or False: Light does not travel in a straight path.
3. Describe how light reaches your eyes.
  
4. List the three things that happen to light when it hits an object.
  - 1)
  - 2)
  - 3)
  
5. Fill in the blanks:  
Black objects \_\_\_\_\_ most of the light that strikes them. White objects \_\_\_\_\_ more of the light. Shiny objects \_\_\_\_\_ a lot of light. Opaque objects \_\_\_\_\_ and \_\_\_\_\_ light.
6. Why do shadows form?
  
7. Give an example of a transparent object and a translucent object.
  
8. True or False: Translucent objects let some light pass through, but only certain colours.
9. True or False: Light moves faster through water than through air.
10. What is refraction?
  
11. Why do objects under water not appear where they seem to be?
  
12. Name the colours of the rainbow, also known as the visible spectrum.
  
13. Fill in the blanks:  
Light with \_\_\_\_\_ wavelengths are red. Light with \_\_\_\_\_ wavelengths are violet.

14. Why do we see rainbows?

15. True or False:

- a) White light is made up of all the colours of the visible spectrum.
- b) We see bananas as yellow because the colour yellow is not absorbed by bananas. It has been reflected.

16. How does wearing glasses help people see more clearly?

17. Name four examples of “invisible light”.

18. Name ways that people use light.
